
EMBEDDING VIDEO IN YOUR POSTS: HOWTO

Posted by admin - 2007/11/29 19:50

Hey,

i just discovered this great feature on our messageboard.
We can actually embed youtube or google video in a post.

don't believe me?
look below:

```
{youtube}WHxJF1y2Auk{/youtube}
```

So how do you do this?

the syntax goes like this:
You open an accolade: {
You add the provider: for example youtube
then you close the accolade: }

you now embed the youtube id. you can find this id looking at the url:
<http://www.youtube.com/watch?v=WHxJF1y2Auk>
the id here is the part after "v=". so it is WHxJF1y2Auk

then you close the tag by putting an accolade AND A BACKSLASH: {\
now you add youtube
and you close the accolade: }

so, the full example becomes

```
{youtube}WHxJF1y2Auk{/youtube}
```

After several trys and w/ Thomas help I've got it. He might live to regret it tho !

Thanks, Thomas: 'The Dylan fans are restless, they need some place to go.'

Example: I entered the text below to finally embed a video!:

```
{ youtube } HhIsYOK_Rmo { /youtube }
```

(Note: you MUST take out the spaces in the above example in order for the video to display. I only included the spaces above to show the necessary text in its entirety.)

The result:

```
{youtube}HhIsYOK_Rmo{/youtube}
```

The above video is from this link: http://www.youtube.com/watch?v=HhIsYOK_Rmo
